

School Meeting.

The meeting of ratepayers called to discuss the question of teachers was held at the school on Friday evening, when about 50 ratepayers were present.

Mr. J. E. Gooder was appointed chairman and Mr. Roger Barrett, secretary.

The school secretary read the minutes of the meeting of trustees appointing the teachers, at the request of Mr. H. W. Chambers.

Mr. A. Brusso moved, and Mr. Roger Barrett seconded the motion, "Resolved that this meeting of electors is of the opinion that the trustees were hasty in terminating the contract with Mr. A. Russell, as principal of Didsbury High School, and also that when positions are to be filled they should duly advertise, and the applicants' qualifications and inspectors' report, if any, be duly considered."

Rev. A. Traub stated he was only there as a ratepayer and could not speak as a trustee.

A number of questions were asked but the school trustees declined to enter into any discussion.

The motion was carried, with two dissenting votes.

Open Verdict in Auto Accident

At an inquest on Tuesday afternoon in the death of Mrs. Lena Horechka, of Roycroft who died as the result of an auto accident, when a truck driven by Mr. Fred Folkman collided with a car driven by the husband of deceased on the Calgary Edmonton highway near Crossfield in June, the jury returned an open verdict.

In brief cause of the accident was when a "mystery plane" flying low broke the telephone wire across the highway.

The lines sagged. Wm. S. Fisher of Bowden, was returning home that evening by car, to which was attached a trailer. On the trailer was piled furniture and the upper portion of the household goods were knocked off by the sagging wire.

Mr. Fisher stopped his car. A few minutes later a truck driven by Fred Folkman, Didsbury, passed the stationary Fisher car, and in doing so, collided with another auto

Women's Institute Constituency Conference

Didsbury West Constituency of the Women's Institute held its annual conference in the United Church on Thursday last.

Mrs. J. Hoesgood, constituency convener, had charge of the meeting. Mrs. Harry Pearson very heartily welcomed the members, and Mrs. Edwin Reed, of Cremona, gave a very pleasant reply.

Mrs. J. P. Ferguson, of Trochu, Provincial President, and Mrs. Ullman, District Director, were present. Each gave very interesting talks, stressing the fact that the constituency was on the upgrade.

Every branch was represented, and each reported a busy year just past. Each branch also contributed its quota of entertainment, which was very much appreciated and enjoyed by all.

About 75 members were in attendance, and the ladies of the United Church served a very excellent dinner in the basement at noon, also tea after the close of the afternoon session.

After goodbyes were said all left for home, feeling they had spent a very pleasant day.

—Mrs. D. Evans

Mrs. Kendrick and Murray are spending a couple of weeks at Sylvan Lake.

Splendid Record

Mr. James Brenner, Secretary of The Canadian Jersey Cattle Club, Fredericton, N. B., writes that:

"The Jersey cow Wiskiki's Viola's Bright Girl owned by N. S. Clarke, Didsbury, Alberta, has recently completed a record of 3,489 lbs. of milk, 541 lbs. of fat, with an average test of 6.37% in 334 days at 5 years of age."

from the north, driven by Uley Badyuk, of Roycroft, in the Peace River district.

Mrs. Lena Horechka, about 60 years of age, sustained such injuries that she died a few hours later.

The jury did not attach any blame to the drivers of either vehicle in the collision.

Killed Night Before Wedding

A sad accident took place at Hainstock 3 miles west of Olds on Tuesday evening when Gilbert Falkenberg of Bergen was killed when a light delivery truck slid off the slippery road into the ditch and overturned, pinning the unfortunate man under the car. His fiancée, Miss Blanche Plant, of Edmonton, and Mr. Ed. Plant who were also in the car were not seriously hurt.

Miss Plant and the deceased were to have been married at Bergen on Wednesday. They came to Didsbury to obtain a marriage license and supplies for the wedding, and drove to Olds to obtain a ring. The accident occurred on their return for home.

The funeral services will be held at the Baptist Church, Olds on Friday at 1 p.m. Interment will be made at Bergen Cemetery. Rev. Oscar Snyder will have charge of the Bergen service.

Legion Field Day Postponed

The inclement weather on Monday made it necessary to postpone the Field Day and Sports arranged by the Canadian Legion.

The date for holding the sports has not yet been decided.

Presentations to Teachers

The pupils of the Didsbury High School entertained their parents and friends to a social evening at the Opera House on Friday in honor of two of their teachers, Miss Irene Grant and Mr. A. Russell.

During the evening Mr. Russell was presented with a silver ring as a token of appreciation of his work and of the esteem in which he was held by the pupils. All Brusso made the presentation.

Miss Grant was presented with a silver-plated cream and sugar set. Miss Jessie McCoy made the presentation and expressed the kindly feelings of the pupils and of their regret in losing her, but wished her much happiness in her new sphere of life.

The evening was spent in dancing and was much enjoyed by all present.

Calgary Exhibition and Stampede

There is no doubt about the fact that the Calgary Exhibition and Stampede, to be held July 9th to 14th, will be a great success. The co-operation that is being extended and the special features that have been arranged are exceptional. In addition to celebrating the 30th anniversary of the incorporation of Calgary, there are the usual features that will be staged on a larger scale than ever. These will include livestock, industrial and domestic exhibits, for which the prizes have been increased by over \$1,000; the stampede parade; the stampede, for which H.R.H. the Prince of Wales has just donated a challenge trophy and gold belt buckle for the champion Canadian bucking horse rider, with an increase in general prizes of over \$400; the mammoth stage production, "The Show of a Century," running horse races, with an addition in purses of \$700 and the addition of a second starting chute, so that all races can be started from the chutes; the dogs; gorgeous fireworks program; horseshoe pitching tournament; special Friday shopping days; Boy Scouts' model camp; outstanding collection of paintings for the Art Gallery; morning street displays, and the Dog Show.

In addition the following extraordinary features have been arranged for:

Giant Television: This wonder invention is the result of almost a million dollars in research. Mr. Sanabria, the inventor, is only 26. The display is made by the General Television Corporation of Canada and staged as a free educational exhibit by the Calgary Exhibition.

The Hunter's Paradise: A remarkable exhibit practically all the wild life of Western Canada.

Alpha the Robot: This mechanical man weighs 7,000-lbs. and is one of the scientific marvels of the age.

Tractor Races: New thrills, with drivers of international reputation.

Royal American Shows: Will provide fun on the midway. Four Ferris Wheels; Al. Capone's armored car. Some outstanding features of the Chicago World's Fair will form part of the midway. Light from battleship floodlights can be seen 40 miles.

Special railway passenger fares are to be in force from Alberta, Saskatchewan and British Columbia mainland points, and two special excursions will be run from Alberta and British Columbia mainland points good going July 10th and returning to 15th, with an additional 2 days' return limit from B.C. points. There will also be special low bus fares.

Very low admission charges will be in force, and the program will, without question, be the most interesting ever arranged for the Calgary Exhibition and Stampede.

WEDDINGS.

A wedding of interest took place Wednesday 7:30 p.m. in the United Church, Swallow, with Rev. J. Lea of Acme officiating, when Margaret Jane Grace Irwin of Didsbury was united in marriage to Robert Reginald Tricker of Swallow.

The bride, who was given in marriage by her brother, Mr. Walter Irwin, wore a gown of white satin with a silk veil embroidered and caught with a wreath of orange blossoms. She carried a bouquet of Madame Butterfly roses.

The bride was attended by Miss Holly Hunsberger who wore a rose gorgette frock with white accessories and carried a bouquet of pink and white sweet peas. The bridegroom was attended by his brother Mr. Alfred Tricker.

Mrs. Frank Tricker played the wedding march and Miss Grace Cameron sang "I Love You Truly" during the signing of the register.

A reception was held after the ceremony at the bridegroom's mother's, Mrs. Bert Tricker, where a buffet luncheon was served, the table being centred by a beautiful wedding cake. Mrs. J. N. Devolin and Mrs. Carl Tricker poured tea. About forty guests attended.

Following the reception the couple left for Banff and other points west. The bride's travelling suit was of navy blue wool crepe with matching accessories.

On returning home Mr. and Mrs. Tricker will reside on his mother's farm four miles east of Swallow.

Halliday --- Liesemer

A quiet wedding took place at the Grace Presbyterian Church, Calgary, on Wednesday, June 27th when Mr. Howard Halliday was united in marriage to Miss Orpha Liesemer, both of Didsbury. Rev. Mr. McGee, of Macleod performed the ceremony. Only the immediate contracting parties were present.

After the ceremony a wedding dinner was served at the York Hotel, after which the happy couple left for a honeymoon to Washington and British Columbia.

That "Bought And Paid For" Idea

There is a curious persistence in the idea current in certain parts of Eastern Canada, that the older provinces of Confederation have proprietary interests in the prairie provinces by "rights of purchase."

Just recently a storm which ranged West against East, broke in the House of Commons at Ottawa, when relief and other expenditures required by Western Canada were under consideration. During the discussion, the "bought and paid for" mentality was prominently in evidence, according to newspaper despatches. It appears inevitable that, when any expenditure which may be construed as exclusively Western, is needed in the federal parliament, some member from one of the older provinces, impelled by this idea, seems bound to object on the ground that the prairie provinces are not entitled to further consideration, and terms such as "blood-suckers" are applied indiscriminately and with reckless abandon, to governments and people of the West.

Forgotten in the heat of debate is the amazing part which the West has played in the material advancement of the Dominion. Forgotten, for the time being, is the gigantic contribution which the wheat-growing prairies have made to the wealth of Canada. Forgotten are the tremendous expenditures made by the Dominion as a whole, for works, projects and purposes which may be construed as exclusively Western. Forgotten is the use made of the resources of the West in the building of great transportation systems of advantage to the whole of Canada. Forgotten is the influence of prairie purchasing power upon the industrial development of the East. Forgotten, too, is the fact that the West's present needs are due to the dire extremity of many of its people—a condition they certainly did not seek and did nothing to create. The "right of purchase" idea reigns paramount over all others when tempers are frayed and local zeal is in the ascendency. In one breath it is admitted that the prairie section has contributed more to the wealth of Canada in a specified period than any other component part of the Dominion. In the next, the prairies are branded as "blood-suckers," draining, as it were, the coffers of Canada which, by implication, apparently are filled solely by the contributions made by the older Eastern provinces.

The idea, of course, has its roots in the historical charter granted by Charles II. of England, in 1670, to the Hudson's Bay Company, which conferred upon that company "rights in the territory tributary to the rivers draining into the Hudson Bay"—including property rights and rights of government. These rights the company exercised in the territory known as Rupert's Land for some two hundred years.

When, however, Confederation became an accomplished fact in 1867, the Canadian parliament, pursuant to the great vision of a united Canada stretching from ocean to ocean, initiated negotiations with the Imperial Government at London with a view to acquiring possession of the territory held under this charter by the Hudson's Bay Company. The British Government agreed to the request on condition that the arrangement entered into would not involve expenditure by the Imperial Treasury, and on the further condition that there should be no surrender of territory until the terms had been agreed upon.

Negotiations with the Company proceeded for two years, during which time it held out for a cash payment of \$400,000 (approximately \$1,500,000, as one of the terms under which it was prepared to relinquish its rights in the territory. The Canadian Government, then, representing the original provinces of Confederation, borrowed the required sum on bond issues which matured in 1901. The money being paid, the Company surrendered its rights under the charter, and Canada stretched one and indivisible from the Atlantic littoral to the Pacific seaboard. That is the story, that the genesis of this "bought and paid for" idea which crops up ever and anon, during debates in the federal parliament.

Obviously, \$1,500,000 is a ridiculously small sum against which to assess a claim of proprietary rights of purchase in the entire prairie section of Canada. It is ridiculously small not only in proportion to the wealth produced normally each year in the far-flung wheat field of the West. It is ridiculously small not only in proportion to the contribution made by the "purchaser" territory, but the aggregate wealth of the Dominion. It is ridiculously small in comparison with the annual contributions made by the Western provinces to the revenues of Canada. That the idea should survive at all in the face of recent history is incomprehensible to Western minds. That it should be used to justify opposition to present claims of certain sections of the prairies for aid in their extremity, demonstrates not only the mental poverty of the objector, but a naive ignorance of obvious facts. Recent economic experience has proved that, instead of the East holding the West in its grip, the reverse is closer to the truth.

Invention For Radio Fans

Dr. Nevil M. Hopkins, of New York University, is the inventor of a new electrical device which he claims will revolutionize the radio, broadcast industry. He calls it the "radio-television" and by use of this instrument, a listener on a broadcast can, by pressing a button, immediately transmit to the station his reaction to the program being presented.

Has Regular Zoo

Pity the provisor who breaks into the room of Kenneth Johnson, University of California student. Johnson, who aspires to be a zoo keeper, keeps eight snakes, a black spider, and a Gila monster in his bedroom. The pets have the run of the bedroom. Johnson studies the best way to make them happy, and improve their intelligence by running them through mazes.

Household Drudgery

The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to do the household drudgery without any relaxation. Is it any wonder she becomes nervous and irritable, has lost blood, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milbom's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

Fulfilling Father's Hopes

Captain Scott's Son Makes Study Of Natural History

Twenty-two years ago Captain Scott, one of the greatest English explorers of all time, lay dying in a tent in the Antarctic.

The last letter he wrote was to his wife. He spoke of their infant son Peter. "Make the boy interested in natural history if you can," he said. "It is far better than games."

Peter Scott is 21 now. He has fulfilled his father's hopes. Recently he opened in Bond street, London, his second exhibition of paintings of bird life.

The grey light of dawn is there; so are the mudflats, the sinuous creeks, the ebb of the tide, and eerie plaintive noises. The curlew calls; you can hear the piping of awakening reishank and stint. Grey geese rise V-shaped into the sky and flight forward to the fresh marshes of the mainland.

It is a world of thrills to the mere wildflower. It is a world of exquisite joy to the wildflower-naturalist, which is what Peter Scott has become.

He shoots little now, as he said recently, but night and day, the winter through, lies in a scooped-out hole in the Wash, or huddles in a pit in the salt marshes, waiting to catch the fleeting visions he has captured in paint.

The Grasshopper Campaigns

Provincial And Federal Organizations To Deal With Menace

The Canadian Insect Pest Review for May of the Dominion Entomological Branch in the 1933 summary of insect outbreaks of that year states with reference to grasshoppers that control campaigns involving the use of poisoned baits were actively carried out in most areas, and, despite many difficulties, resulted in the destruction of vast numbers of grasshoppers and the material saving of crops. In July and August, extensive dispersal flights of grasshoppers occurred in many parts of the infested region. As a result, practically all of the open prairie land of the three Prairie provinces is now infested, and the areas of severe infestation have been considerably extended, except in Eastern Manitoba where there was an encouraging reduction. It is expected that during 1934 the outbreak will be even more intense and destructive than that of 1933, and consequently Provincial and Dominion authorities are organizing a comprehensive campaign to deal with it.

Dredging For Gold

Work To Be Started On Jugoslav-Rumanian Border

Modern miners are to attempt to dredge the River Pök on the Jugoslav-Rumanian border, on the bed of which gold has been collecting for more than 2,000 years. Up this river sailed Jason and his Argonauts from the Black Sea, and the Golden Fleece of their quest is no legend today, for the peasants of the Pök River Valley steep sheepskins in the water and after a few weeks pull out golden fleeces. The alluvial gold brought down from the mountains by the water having settled in the wool. It was here that Alexander found all the gold for his expedition in 328 B.C. Firms of many nations have made bids to supply the dredging machinery and the operations are expected to be extensive.

Dwarfs Holding Congress

Likely To Take Place In Budapest

Next Year

Fired by the Nazi doctrine of racial purity, dwarfs of Hungary have formed a National Union of Hungarian Dwarfs and have invited all the dwarfs of the world to a Dwarf Congress which is to be held probably in Budapest next year. Their creed is to "preserve the purity of the dwarf race," to forbid marriage with non-dwarfized people, and to demand lower fares and smaller houses for all tiny folk. Their leader, their Hitler, is said to be 30 inches tall.

The world is wide, but there are lots of narrow people in it.

Vaccine For Tuberculosis

New Preparation Being Tested On

Experiments to find a cure for tuberculosis in cattle continue in various parts of the world. The Spahlinger vaccine, of which much was heard two or three years ago, is still undergoing tests, the most recent of which have been made in Northern Ireland under official auspices. The calves vaccinated with the Spahlinger preparation have survived the injection of heavy doses of tubercle infection and are thriving, while untreated calves have succumbed.

As the United Kingdom is now embarking on a national campaign to clean up her dairy herds and to eradicate tuberculosis, the final results of the Ulster trial seem likely to offer an economical and practicable means of immunising dairy cattle against tuberculosis and gradually ridding the country of a scourge which is costly to public health and farmers.

Islands in a river, unless caused by rock outcrops, are continually traveling downstream as the currents cut at the upstream end and the island and deposits at the other end.

A Closely Guarded Secret

Germany is closely guarding its experiments with radio-controlled airplanes. It is reported that successful flights were made by a machine entirely without a crew, direction being entirely by radio. The tests were made under greatest secrecy, and officials refuse to divulge any information.

Good Friend To Horses

When Policeman M. Elwood prosecuted John Hill, a groom, for cruelty to a pony it made the 1913B equine he had befriended in court. Elwood has been on the London force for 20 years. A lover of horses, he watches for cases of cruelty and brings the offenders before the law.

Ease Pain, Headache in Few Minutes

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia—the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of a glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly as you swallow it. And thus it is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

The British Imperial Policy Has Been One Of Greatest Factors For Maintaining World Peace

The British Empire had not followed a "policy of drift" in international affairs since the war, Prime Minister R. B. Bennett asserted before a meeting of the League of Nations Society in Canada, at Ottawa. Its policy had been one of maintaining the peace of the world and the solidarity of the Empire. He believed that the British Empire had been one of the greatest factors for peace and he expressed the view that under present conditions a "League of Amity" made up of the United States and the nations flying the British flag would be a tremendous factor for peace.

The prime minister spoke briefly at a luncheon of the society addressed by by Esott Reid, secretary of the Canadian Institute of International Affairs. Speaking on "A Foreign Policy for Canada," Mr. Reid asserted that "it is as simple as this: we stopped talking about what Great Britain, or France, or the United States should do." Citizens of Canada could exert a direct influence over only one government. That was the government of Canada.

He expressed the belief that the League of Nations had not dealt with basic reasons for disputes, and that it had allowed itself to become "an instrument of the satiated powers against the proletarian powers." Thus it was that powers like Japan, Germany and Italy were withdrawing their active support from the League.

In looking over world conditions, Mr. Reid painted a dark picture. "It looks as if the disarmament conference was going to end, not in a bang but in a whimper." The world was gazing at the failure of the machine which it had set up to prevent war.

Senator A. D. McRae, who moved in the senate that Canada withdraw from the League of Nations, was to be congratulated on the fact that he refused to accept a policy of drift, Mr. Reid said. But, if Canada withdrew from the League, could Great Britain also withdraw, and if she did would it exempt her from being drawn into European wars, and finally, if Great Britain was drawn into another first class war, could Canada stay out. The only choice for Canada, in the event of Great Britain being drawn into another war, appeared to be between joining her and secession from the Empire.

If Canada seceded from the British Empire, Mr. Reid suggested that this country would be dependent on the United States for defence. The Dominion might eventually become a protectorate of the republic.

But was the world situation hopeless as far as maintaining peace was concerned? There were steps to be taken which could help, and Canada should be willing to do her share, The Dominion, said Mr. Reid, must be willing to make necessary sacrifices. This country might, for instance, repeal the provisions of the Chinese Immigration Act and substitute an agreement like that with Japan under which 150 Chinese would be admitted every year. Canada might be willing to accept the mandatory principle in respect to British possessions thus sacrificing the tariff preference at present prevailing. The Dominion should be ready to do her part.

Mr. Bennett opened his remarks by saying that he was minister of external affairs of Canada because of a statute and not by choice. This statute declared that the prime minister must also be minister of external affairs. He mentioned this because some people appeared to think he had allocated this department to himself. He had not done so.

He thought that Mr. Reid had offered a violent indictment of the League of Nations. It must be remembered that the world was confronted with conditions and not theories. There was a very considerable body in the House of Commons and senate which felt that the expenditure of Canada on the League of Nations was out of proportion to the benefits received. He was not one of them, said Mr. Bennett, because

he realized that it amounted to only about the cost of two days of the last war.

The policy followed in the British Empire was one of maintaining the peace of the world and the solidarity of the Empire. He believed that the British Empire had been a great factor for peace. He warned the audience that the world moved slowly, but it progressed. The progress, he believed, had been slow and steady.

Australia's "Costly Failure"

Demonstration Farm With All Build-

ings Has Been Leased.
For five shillings a week rent and a lump payment of about \$620 for improvements, the Australian government has leased its "costliest failure," otherwise its \$150,000 demonstration farm at Batchelor. The sale comprises 2,533 acres of land at the farm, all the buildings and the leasehold of 48 square miles of territory adjoining. The farm was established in 1912 and was a complete failure in most respects. Costly pedigreed stock were killed by pests or bogged in the wet season; the sheep were killed by grass seeds, and dairy cattle died of heat or were eaten by crocodiles. White ants ate the stables, machinery sheds and barns, and the soil proved a disappointment. Pineapples, corn and tropical fruits flourished with irrigation. The purchaser, J. Gaden, will use the farm to pasture his horses in the wet season.

Death Ray Apparatus

C. R. Chadfield, a scientist in England, is the inventor of a death ray apparatus that is capable of producing a high frequency electrical oscillation of 300,000,000 cycles between two copper plates. Actual experiments have shown that insects, mice and flies which have come in contact with the ray were killed instantly without so much as leaving a mark of violence on their bodies.

FASCINATING SUMMER SPORTS

BOUSE

There's slowness too in buttoned front closing. You can indulge in numbers of smart blouses with today's pattern. Make one in bright yellow linen, another in red and white handkerchief-finish lawn print and perhaps a third in yellow and brown printed sateen. Each blouse will appear entirely different. And think of it—you can have the three blouses for about the cost of one ready-made blouse.

Gingham, seersucker, organdy, novelties, tub silks, etc., are also suitable.

Style No. 845 is designed for sizes 14, 16, 18 years, 20, 22 and 24 inches bust. Size 16 requires 1 1/2 yards of 35-inch material. Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

Necessary To Take Steps To End Causes Which Are At Root Of World Wheat Problem

Shelter Belt Information

Proper Sketch Needed To Determine Number Of Trees Required For Given Area

In the assistance given by the Dominion Department of Agriculture to prairie farmers in planting tree shelter belts, it has been found that applicants living at a distance or where an inspector has been unable to make a visit have not given sufficient or clear enough information to enable the Forest Service to figure out the required number of trees. In many instances the full length and breadth of the land prepared for planting the shelter belts have not been given, and the position and distance of the permanent buildings from the proposed belt have been frequently omitted. To rectify this, a short circular has been issued on how to make a sketch of the proposed shelter belt by the superintendent of the Forest Nursery Station, Indian Head, Sask. It is important when an applicant sends a rough sketch to the station at Indian Head or to the station at Sutherland, Sask., that the measurements must be shown, both length and breadth, of all ground ready for planting; also the distance between the inside of the proposed belt and any permanent buildings, and the position of any existing plantations or belts of trees. The measurements should be given in yards, not in rods or feet.

Find If Tag Not Removed

Umbrella losers in London are no longer trailing around to lost property offices and departments in search of the missing article. Someone had a big idea and it is working smoothly. The umbrella loser receives a card telling the lost has been found. All that he has to do to obtain this service is to fasten an address clip to the umbrella.

George Washington was not a signer of the Declaration of Independence.

Before the world depression, the geographical distribution of the world's wheat crop was largely determined by costs of production. As a result of mechanization and biological improvements, costs had been substantially reduced, especially in the United States, Canada, Argentina and Australia. Since 1929, however, the cost factor has been increasingly disregarded. By means of tariffs and subsidies, total production in importing countries (and above all in the European importing countries) was increased from an average of 1,059 million bushels during 1927-29 to 1,400 million bushels in 1933. During the same period the crop of the exporting countries, excluding the U.S.S.R., was reduced from 2,589 million bushels. But curtailment was not drastic enough to prevent an enormous accumulation of stocks in exporting countries and a collapse of free-market prices.

This large-scale geographical redistribution of the world's wheat crop could only be carried out at the expense of producers in exporting countries and of consumers in importing countries. As a result, the demand of importing countries is being prevented by the maintenance of prices at a level far above free market quotations. In an attempt to alleviate the plight of wheat growers in exporting countries, governments of importing countries is being prevented by the maintenance of prices at a level far above free market quotations. In an attempt to alleviate the plight of wheat growers in exporting countries, governments of importing countries is being prevented by the maintenance of prices at a level far above free market quotations. In an attempt to alleviate the plight of wheat growers in exporting countries, governments of importing countries is being prevented by the maintenance of prices at a level far above free market quotations.

This state of affairs, which defies adequate description, is calculated to fill the rational observer with despair. It savours of an economic fiasco, but the large numbers of undernourished and even starving people in the world give the farce a tragic twist. It is earnestly to be hoped that the Advisory Committee will at last face the real wheat problem and take steps to solve it speedily. The responsible authorities of the importing countries must realize that unless they are willing to accept the wheat of the exporting countries they cannot hope to sell their manufactures abroad. Similarly, the governments of some of the exporting countries should consider a reduction in their tariffs on imports of manufactures lest they be held responsible for the ruin of a large proportion of their agricultural community. Tackled on these lines, the wheat problem is not impossible of solution. The future of the great wheat-growing countries seems assured in years to come, since the present wave of economic difficulty will no doubt pass; but the urgency of the problem looks no delay. The Economist.

Green Candles Light

Found Most Suitable And Its Use Is Increasing

The Dominion Department of Agriculture, recognizing the importance of standardizing egg candling equipment in Canada, initiated investigations as to the most suitable light for that purpose, and, as an outcome of research by the National Research Council, a green glass filter has been evolved. Within recent months, this use of a green light has gained considerable popularity in the Dominion. Many commercial firms have adopted it in their candling rooms, and green light candling appliances are being used exclusively by departmental officers. The ideal light, it is stated, would be blue, because blue does not contain any of the pink color of the egg. However, the human eye is not very sensitive to blue and for that reason blue is an undesirable color for candling purposes.

A parachute, which resembles a giant seed of a maple tree, and which will permit man to descend at paces for low altitudes has been invented.

The sixtieth annual general meeting of the Canadian Manufacturers' Association was held in the Windsor Hotel, Montreal, on June 14th and 15th. Our layout shows the officers for last year: Left: Top to bottom: J. H. Webb, Montreal, First Vice-President; J. G. Robson, Chairman B.C. Division, Vancouver; T. F. Monypenny, Hon. Treasurer, Toronto; J. A. Wetherston, Chairman Prairie Division, Winnipeg. Centre: Top to bottom: L. L. Anthes, President, Toronto; A. L. Page, Chairman Ontario Division, Hamilton. Right: Top to bottom: W. R. Dryden, 2nd Vice-President, Hamilton; J. E. Walsh, General Manager, Toronto; E. Howard Smith, Chairman Quebec Division, Montreal; N. A. Heiler, Chairman Maritime Division, Sackville, N.H.

Burnside Notes.

Born: In the Trechu hospital on
Thursday, June 28th to Mr. and
Mrs. Ronald Dundas, a daughter.

Messrs. Sam McAllister and Percy
Saunders were Sunday visitors at
the home of Mr. N. Eckel.

Lone Pine W. I. will meet on
Thursday July 12th at the home of
Mrs. Sam Elliott.

The annual Hall Board picnic will
be held at Lone Pine Hall on July
18th with dance after.

Mrs. Clarence Weal and son
Teddy of Calgary, are visiting the
former's parents Mr. and Mrs. A. E.
Thompson.

Mr. H. J. Tugale wrote some
years ago to his brother who lives in
Kansas. He never received an answer
until lately, so H. J. answered his
brother's letter with a birthday card
which read as follows:

We have some lovely sisters: one,
two, three,
And I have but one brother, and
that is Brother Lee.

He was born in April, but not an
April fool.

All he lacked in being smart—he
never went to school.

It is not the schooling that takes
to make the man.

It is by helping others and doing
all you can.

There's two of our sisters' birthdays
I can't or don't remember,
But Sister Lucy's birthday is the
eighth of December.

Oh yes, and there's my wife, I
must not forget.

For she's the nearest to me of
any of them yet.

Just the other day I heard somebody
say

That she was sixty-six the nine-
teenth of May.

I have five living children, one has
gone to rest.

And I'm going to meet her, or do
my very best.

Now I must bring this down to
a close.

Whether I live to see another birth-
day, God only knows.

No matter what I've said, no matter
what I've done—

Should I live to see another—it's
only eighty-one.

Of all the papers that I care to read
there is none that is while I'm here—
It is the Didsbury paper, the Didsbury
Pioneer.

**Didsbury Postmaster
Dominion President**

W. H. T. Morgan, postmaster at
Didsbury, was elected president of
the Canadian Postmasters' Association
at the annual convention held at
Windsor, Ont. last week.

No further annual conventions
will be held, Mr. Morgan told the
Herald yesterday morning, election
of officers hereafter being carried out
by the Dominion executives, who
will meet after the annual provincial
sessions for that purpose.

W. St. J. MILLER**PATENT ATTORNEY**

Located at 703 2nd St. W., in Calgary, specializes in securing Canadian and foreign patents and trademarks covering inventive devices, developing patent rights.

There are doubtless many of our readers who, at one time or another, have conceived an idea or a plan for the perfection of an article, which, if engineered carefully along legal lines and completed, might have been a step forward in industrial development. By placing matters of this kind in the hands of Mr. Miller one can at once satisfy his ambition, so to speak, and frequently an article of genuine utility value finds its way to volume production at the hands of large manufacturers, representing to the inventor either a royalty, outright sale, or a holding interest in the concern—and financial independence in many cases.

Thus with the completion of such inventive device follows a type of legal work that calls for a marked degree of skill; that of securing and protecting patent rights and safeguarding against infringement.

Mr. Miller is thoroughly experienced and reliable, and has connections at Ottawa and Washington, D.C., for the handling of this work. He has achieved a reputation for holding the interest of the public concerned in following the path of modern invention. He is prepared to secure patent rights with all due promptness. His work is of meritorious value and worthy of consideration in the minds of those requiring such aid and service. (Int'l News Syndicate Release).

Alberta Produce Co. Ltd.

Makers of "Cream-Crest" Brand of Creamery Butter

Located in Calgary, is one of the modern institutions of Alberta, aiding in the progress of diversified farming. They operate a modern butter manufacturing plant and buy cream from local farmers.

The Alberta Produce Co. Ltd., under the able direction of Mr. J. S. Watson, operate a model and sanitary institution, equipped with modern machinery and under the direction of local dairy creamery men.

This institution probably typifies better than any other the material progress of the community; the fact that Alberta is organized along twentieth century lines as regards the continual growth and development of commerce and agriculture. Years ago there were small creameries in every community to which the producer sent to market his cream and to which the retailer looked for his supply of creamery butter for his customers. Many of these concerns turned out a very high grade of creamery butter which won much favor with the public. But as new and modern methods came to be appreciated these small institutions gradually passed.

Popularity with both the producer and consumer is evidenced by the large number of farmers selling cream to the Alberta Produce Co. Ltd., and the fame their creamery butter has attained. By reason of the fact that they handle large volumes of business through modern equipment they are able to pay the farmer the highest price for his cream.

At the offices of this company the farmer receives the most courteous of treatment and a special invitation is given to all to call and get better acquainted.

The production of cream is a proposition that ought to appeal to every owner even of a small farm, as it is a well known fact that this mode of farming builds up the land, at the same time making for the producer more money than he can make by straight farming.

(Int'l News Syndicate Release)

Bell Refining Co. Ltd.

With headquarters in Calgary, under the direction of Mr. F. J. Huff, are distributors of gasoline, oils and greases, known by their high quality and general efficiency.

With the rise of the automobile industry to first place among the industries of the nation, with automobiles the predominant means of transportation, there has arisen an entirely new business of oil refining and distributing—a business which has made itself an indispensable factor in every community.

No business is more essential and valued than gasoline and oil distribution, and we know of no better representative than the Bell Refining Co. Ltd., who are a Canadian organization employing Canadian help.

With its products available at many of the prominent service stations throughout Calgary and Alberta, this company is serving the motorist in a most capable manner. Their business has grown and carries prestige for a reason other than the high quality of its product and efficient service to the public.

"Bell" gasoline needs no coaxing to spark and no wasteful crowding to keep the motor running. Its full, free vaporization is natural under all con-

ditions, taking the scientifically correct proportion of air that means a clean, dry, all burning explosion of true economy. It makes an ideal starting mixture ready for the faintest hint of the firing spark or the heaviest pulls of traffic emergency. So why change gears? Change to Bell gasoline.

"Veelol" (1st grade), "Sternol British Oil" (2nd grade), and "Lube-Bell" (3rd grade) motor oil permits smooth travel with better effect on your engine—giving maximum driving comfort without means or the delusive self-bribery of empty saving. Not only are these motor oils of high quality, but the company realizes that smooth motor performance also depends on the quality of the oil used and so their lubricating oils are graded to suit every type of motor on the road.

The products of the Bell Refining Co. Ltd. are served to the public with that distinctive courtesy which makes the stations of its agent popular.

"What Alberta makes makes Alberta."

(Int'l News Syndicate Release)

Standen's Spring & Trunk Manufacturers

Located at 2415 2A St. E., in Calgary, operate an exclusive spring house. They manufacture and repair automobile springs for passenger cars and trucks.

In this age of the automobile comfort has become a factor of paramount importance. Not only does one wish to be taken to his destination as rapidly as possible, but with the least degree of discomfort. This has evolved the science of automobile spring manufacture.

The Standen's Spring & Trunk Mfrs. have made a special study of this business and therefore are able to give advice on proper selection of springs for either car or truck, which will insure the greatest degree of comfort and service.

The kind of springs with which an automobile should be equipped depends upon the type of body and weight of the car. If the machine is light, a spring that will give easily and absorb the shock is advisable. If the car has a heavy body another type of spring may be used to better advantage. It has also been found that serviceability of the spring depends on two factors: the quality of steel and the method of heat treatment it receives.

The Standen's Spring & Trunk Mfrs. provide the best grade of high carbon spring steel which are so designed that the weight of the machine (passenger car or truck) is evenly supported. For the heavy duty truck there have what is known as the "overload spring," which consists of an extra spring set in brackets over or above the regular car spring.

Much of the spring trouble experienced by automobile owners is due to lack of proper care. Therefore a repair and inspection department is maintained. Employees will make an intelligent inspection and if repairs are needed the work will be done at a reasonable charge. They specialize in resetting springs to proper tension.

(Int'l News Syndicate Release)

PLUNKETT & SAVAGE

Importers and Wholesale Distributors Fruit and Produce

With office and shipping quarters in Calgary, are importers of bananas, oranges, lemons, lard, fruit, and a deal in all kinds of berries, vegetables, potatoes and produce; doing a wholesale business in receiving and shipping.

Plunkett & Savage make a gospel of quality which has laid first claim upon the favor and patronage of discriminating people and the farmers.

Because of the volume of business transacted, because of their competent business methods and the high quality of products handled, this firm has helped gain for Calgary a commercial prestige as an excellent market for the consumer and for the farmer who has produce to market.

Thousands of dollars are brought into this section each year through the trade channels controlled by them and many people are thus afforded employment. The fact that their trade extends for a radius of many miles of Calgary brings new faces, new business and adds prosperity to the city and community.

In establishing the firm, it has been the policy of its executives to supply the trade—retail merchants and restaurants, a service which has been invaluable in with the highest standard merchandise. The top market price is paid at all times for the best quality vegetables and country produce. Each department of this firm is in charge of an executive who controls a constant wholesale conditions in the fruit and produce market.

In reviewing the various business interests of Calgary, it is the publisher's wish to place the service rendered by this concern before the public believing that the community has a great interest in knowing of their operations and will also serve as a reminder to the farmers and country people in a quarterly as to a suitable firm to deal with.

Canadian Bakeries Ltd.

Bakers of "4-X" Bread and Cakes

With local plant in Calgary, under the direction of Mr. D. A. Ross, is a model institution and a tribute to the industry and growth of a city. Do a large wholesale business. Their products best money can buy.

The Canadian Bakeries Ltd. are one of the most prominent in Western Canada. Their many plants are modern and sanitary in every particular. Out-of-town residents visiting Calgary are cordially invited to visit the local plant when convenient and view the latest improved equipment in the way of "mixers," ovens and wrapping machines for the wholesale production of bread and learn how precisely and evenly the dough "mix" is prepared and baked in order to secure a tasty, rich-looking and sanitary loaf. Necessarily the business is under a progressive management and serviced by employees whose working conditions are ideal.

This firm's business has increased so rapidly that improvements have been made from time to time until today they have a plant as modern and up-to-date as any in the present condition indicate a still further expansion of its business. Everything about the plants is scrupulously clean as it is the policy of the institution not only to make bakery goods that will pass inspection but to turn out products that are as neat an approach to the acme of perfection as modern methods will permit.

Bread contains carbohydrates for fuel, protein for growth, and energy, fat for fuel, minerals for hardening the bones and health vitamins as vital necessity for proper nutrition.

Necessarily, they are the large distributors throughout the district, making shipments daily from their local plant. "4-X" bread and bakery goods are established products and demanded by thousands of housewives.

(Int'l News Syndicate Release)

Jean Carroll School of Beauty Culture

Located in the Alberta Bldg., in Calgary, is an institution where students of beauty culture receive thorough training which fits them for highly paid position. Have established large patronage under the direction of Jean Carroll.

In compiling a business review of Calgary, we felt that it would not be complete without a word to the fair sex, inasmuch as this institution is of especial interest to women. They have built a business which ranks with the best in its field, for they have acquired a reputation that many more pretentious establishments might really envy; the result of long years of preparatory training by its directing heads in laboratories where were studied the chemistry of beauty preparations and beauty culture until the science was mastered. This knowledge is now placed at the disposal of the numerous students who are learning an interesting and profitable profession.

The curriculum includes shampooing, hair dressing, permanent waving which is featured, manicure, waxing, scalp treatment, beauty treatments, dressing, hand and arm moulding, manicuring, facial massaging and all the face beauty culture.

While they cannot guarantee to place students of professional intent in engagements at the conclusion of their studies, their affiliations with the beauty culture profession make it possible to place many students who have shown aptitude.

We are glad to refer to the Jean Carroll School of Beauty Culture, for we believe that those of our readers who are interested in their work will appreciate the advantages of the service and low tuition fee for students. Phone M377 for information.

(Int'l News Syndicate Release)

WORLD HAPPENINGS BRIEFLY TOLD

The Straits Settlement legislative council adopted a bill restricting rubber production in conformity with the London agreement.

France and Great Britain plan to consider jointly the problem of debts owed to the United States at a meeting of envoys in Geneva.

Forty aborigines and whites have perished in Western Australia, victims of a mysterious disease, the Daily Herald's Australian correspondent has cabled.

Hints are heard that a new move would be made to get Germany back into the bickering world disarmament conference. The move was said to revolve around the United States.

The body of Sam Behan, Portsmouth penitentiary convict who died suddenly of a heart condition, has been claimed by his widow and has been sent to Brooklyn, N.Y.

Half a million pikelets fry were deposited recently in the Moose Jaw river at the Wild Animal park by officials of the department of natural resources.

Definite adoption of a pacifist attitude and committal of the organization of public opinion in the interests of peace was made at Toronto at the conference of the Association of Canada Clubs.

Birth of five daughters to Mrs. Olive Duane near Callander, Ont., is the first quintuple birth in Canada. So far as he knows, Dr. F. C. Routley, general secretary of the Canadian Medical Society, said.

The shipments of livestock from Western to Eastern Canada during the first 17 weeks of 1924 and 1925 latter figures within brackets) were: Cattle, 29,267 (42,135); calves, 164 (19); hogs, 82,908 (118,992); and sheep, 40,423 (32,245).

Low Price For 'Planes

Britain Sells Reconditioned Fighters For Two Hundred Dollars Each

Aeroplane entirely reconditioned and capable of doing 120 miles an hour, price \$200.

The British air ministry has sold many of these aeroplanes at prices usually given for second-hand cars.

They originally cost \$20,000 and were built as fighters, with engines which cost at least \$5,000. They are in perfect condition and are almost as airworthy as when new.

There is one which is now on offer for \$250, but for the extra \$100 you get a spare engine, two spare wings and the all-important certificate of airworthiness. The machine is of a wood-famed make and in tip-top condition.

These machines and engines are obtainable at these crazy prices because they have been superseded by later fighting models. While light aeroplanes can be used fairly cheaply these powerful machines cost so much to run that few private owners can afford to run them.

DENICOTEA CIGARETTE HOLDER

Agricultural Notes

Many Items Of Interest To The Western Farmer

The average annual loss in the Prairie Provinces through cereal rust is estimated at \$25,000,000.

Comparing Revived, Marquis, and Garnet wheats as to protein content, Revived stands highest, Marquis second, and Garnet third. Dominion Division of Chemistry.

To produce an acre of turnips in the six Dominion Experimental Farms in Eastern Canada (1923-24) required 127.4 hours of manual labour and 7.6 hours of horse labour.

The total resources of spruce throughout Canada are estimated at 600,000,000 cords which, if turned into paper, would have a value of \$88,000,000,000.

The application of toxic materials in the form of finely-divided powder was used by the Greeks and Romans who threw ashes, lime, and other materials on plants to protect them from the ravages of disease.

As a source of nitrogen in a fertilizer mixture for tobacco, soybean meal was found to be equal, if not superior, to cottonseed meal in a recent test at the Dominion Experimental Farm at Harrow, Ont.

As the result of a questionnaire from representative farmers in Eastern Canada it was found that the average annual cost of operating farm machinery was \$2.85 per acre of cultivated land.

For more economical production of crops in Eastern Canada, large-sized farms, or a greater area of land under cultivation, would seem to be necessary. Dominion Department of Agriculture bulletin on farm crop costs.

Authorities who have worked specially on the iodine content of waters in relation to the occurrence of goitre have stated that in districts in the Western United States, in which the iodine content of the water is below 0.5 parts per billion, goitre is likely to be quite prevalent. The original feed Bobs selections of spring wheat, as developed by Senger Wheeler, Rothman, Susskatchewan, and re-selected by him, yielded two outstanding forms to which he gave the names Early Triumph and Supreme. In general appearance these two forms are very much alike.

The value of information given by the Dominion Department of Agriculture respecting the composition and nutritive value of feeds is more and more being realized. When put into practice this information leads to a lowering in cost of production of all animal products on the farm, milk, beef, pork, eggs, etc.

One acre contains 160 square rods, 1,280 square yards, or 43,560 square feet. If the length and width of any field be known, the required width and length to enclose any acre may be found by dividing the known distance in feet into the number of square feet in an acre. The length of a side of a square acre is 208.71 feet.

In the Prairie provinces much interest has been shown in the use of triple superphosphate and ammonium phosphate as a means of increasing crop yields. As yet, the data obtained in this work are insufficient to make any definite pronouncement, but it would appear that under favourable conditions nitrogenous and phosphatic fertilizers, more particularly the latter, may be used to advantage to increase the yields of grain in certain sections of the Prairie provinces. Dominion Division of Chemistry.

Power From The Clouds

Hope To Obtain Electrical Energy From Lightning

Studies of the various phases of lightning and thunderbolts have been undertaken by Dr. E. F. A. Schuch, land, director of research for the Institute of Electrical Engineers, at Johannesburg, South Africa, with the hope that knowledge of the mechanism and nature of thunderbolts may enable man to utilize at least part of the tremendous electrical energy being constantly built up in the clouds and discharged to the earth.

A bee has been found to travel 42,776 miles in gathering one pound of honey.

BUTTON CLOSING GIVES SMART INTEREST AND YOUTHFULNESS TO NAVY AND WHITE TIE SILK PRINT BROKE

There is immense satisfaction about getting something with clean cut, stylish lines. It gives one that trim feeling.

Today's smart, little sports dress has much individuality. It's very simple to make it. And it can be cleverer, if you prefer it. See small back view for the drop shoulder that covers the upper arm so modestly.

For frankly hot wear such materials as striped or checked seersucker, pique, linen, shirting cottons, plaid gingham, tub pated silks, printed satens etc., will be smart. Style No. 745 is designed for sizes 14, 16 and 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 4 yards of 39-inch material with 1/2 yard of 38-inch contrasting.

Price of pattern 20 cents in stamps or coin cash only is preferred. Wrap

Celebrates Centenary

Sportsmen Started Racing Club In France Hundred Years Ago

Organized horse-racing, in France, is just one hundred years old, and recently at Longchamp a special race to honour the centenary was run.

The society came into being in November, 1825, as a result of a sudden storm over Paris which drove a number of sportsmen into a cafe at the Palais Royal. While waiting for the weather to clear up, they discussed racing, and there and then decided to form a racing society. The president was Lord Henry Seymour, about whom plays, films, and novels have been written. The first secretary was Mr. Thomas Huxton, an Englishman, who carried a Paris shooting gallery. The first race-meeting was held on the Champ de Mars, Paris, on May 1, 1824.

Below London is a natural underground reservoir of water stretching about 30 miles north and south of the city and the same distance east and west.

The United States is represented in 36 foreign countries by ambassadors

A Cherished Possession

Original Death Warrant Of Scottish Queen Owned By Calgary Man

The death warrant which brought the lovely head of Mary Queen of Scots under the executioner's axe and shocked a nation which loved her, is in Calgary.

It was shown in a recent exhibition at the Curio Shoppe at the Hudson's Bay Company's store, and is one of the cherished possessions of A. W. Riddle, for many years an antique dealer and collector in London, England. It came into Mr. Riddle's hands from an English family named Howard, in whose possession it had been for several generations.

Signed by Queen Elizabeth in 1587, the warrant has many words crossed out, and the edges are worn, but the bold black writing stands out clearly, though far from legible. Neatness required of modern stenographers was apparently valued lightly in the sixteenth century, for the warrant has many words crossed out, and others inserted above the lines. The old style letter "s" adds further confusion for those who have been studying the document.

A copy of the London Times of 1840 rested beside the historic warrant, and large reproductions of woodcuts illustrate scenes from the marriage of Queen Victoria and Prince Albert, the Royal Consort. The woodcuts offer interesting studies of the costumes of the period, and the faces are still clear and delicately marked.

A chronological tree of British history tells the story of the Empire's rise, traced through intricate branches and trunk in forest of letters. A book containing 270 seals of kings and emperors, princes and the nobility of several European countries, goes back to the time of King Edward I. and Edward III. The seals are of heavy wax on parchment, their crests and vivid coloring very little dimmed with the passing of the hundreds of years. These, too, are from Mr. Riddle's valuable store of antiques, which also includes some of the early copies of Shakespeare and Milton.

Produced In Dominion

Canadian National To Feature Home-Grown Foods On Dinners

Distinctive Canadian foodstuffs and dairies in their proper season will be a feature of the table d'hôte meal service on the trans-continental trains of the Canadian National Railways, commencing with the abolition of a la carte service on these trains, stated W. W. Swinden, general superintendent of sleeping, dining and parlor car services on the National system. Sea foods from the Maritime provinces; meats, including the famous Ontario spring lamb; fresh water fish, including Lake Winnipeg gidegys, and fruits from the Maritimes, Quebec and Ontario, and the famous Okanagan valley of British Columbia will all be featured in these plate service meals at appropriate seasons.

"Tourists from the United States when they board our trains at border points and visit the dining car will find fresh broiled hickory, smelts, baby mackerel and other favored sea foods, along with potatoes from Prince Edward Island, apples from Nova Scotia and blueberries from the Maritime provinces, all with places of honor on the menu when these foods are at their best," said Mr. Swinden.

Awarded Medal

Canadian Writer Receives Recognition For Outstanding Contribution

Frederick Philip Grove, awarded the De Lorne Bruce medal for his outstanding contribution to imaginative literature, is a native of England. He came to Canada in his youth and one of his first jobs was that of a waiter in a Toronto restaurant. Later he settled on a ranch in Western Canada and lived there for several years. It was while ranching that he wrote "In Search of America," which work he is best known by. He subsequently became head of an Ottawa publishing house.

The famous European news agency, "Reuter," started business some 80 years ago with a pigeon post service.

Little Journeys In Science

SPONTANEOUS COMBUSTION
(By Gordon H. Guest, M.A.)

Combustion of a fuel has been shown to be the rapid chemical combination of the material with oxygen, accompanied by the production of heat and light.

The temperature to which a substance must be heated before it will burn is known as the ignition or kindling temperature. We know that paper and wood will ignite more easily than coal. When we use a match to light a fire, we rub the match-head until friction has heated it to its kindling temperature, and the tip burns. The heat of the burning tip raises the temperature of the stem to its kindling temperature, and so the process continues until the wood or coal reaches its kindling temperature, and burns. As long as a substance is cooler than its kindling temperature, it cannot burn.

Sometimes we have a slow combining of oxygen with a substance which develops into active burning, and this is known as spontaneous combustion. Scientists have shown that a given weight of material, for example iron, in combining with oxygen to form a certain oxide, will give off the same total amount of heat whether the union proceeds rapidly or slowly. If the combining goes on slowly and the heat goes off, little rise in temperature will be observed. But if the material is a poor conductor of heat, we find that the heat accumulates until the kindling temperature is reached and burning commences. Such a situation often occurs in the case of coal. The oils used in making paint (linseed oil and turpentine) are left lying about, instead of being placed in a metal can, or, better still, burned. These oils, in "drying," combine with oxygen from the air, and turn into a tough, resin-like material. Rags being poor conductors, the heat developed finally sets the mass on fire. Fires in coal bunkers and hay stacks arise from the same cause: slow combination with oxygen, with the accumulation of the resulting heat until the kindling temperature is reached. The bench-wrecked carcass of the whale has been known to take fire spontaneously due to the union of oxygen with fat.

To Visit Australia

Duke Of Gloucester To Make Extended Tour In September

The British government has announced that the Duke of Gloucester will leave for Australia in September, aboard the H.M.S. Sussex and will spend four days at Colombo, Ceylon, before continuing to Perth, West Australia, where he is due October 5.

He will arrive at Melbourne, Victoria, two days later and will open officially the centenary celebration of the state of Victoria.

His Royal Highness will sail December 10 from Brisbane, Queensland, going home via New Zealand where he is due December 15. He will leave that Dominion at the end of January and proceed via Bay of Islands for deep sea fishing.

He will visit Fiji, Western Samoa, sail through the Panama canal and possibly touch Jamaica en route to England.

The Duke of Gloucester, the king's third son, will go to Australia instead of his younger brother, Prince George, who visited South Africa in the spring.

Advice From Tibet

Newspaper Tells World How To Restore Good Times

Tibet's only newspaper, which comes out once a month, knows just what is the matter with the western world. It is called The Mirror of Events in Every Corner of the Globe. It asserts that the economic crisis has been caused by wheels, because machines "enable two men to do the work of 20,000." Unemployment means no money and lack of money kills trade, the argument runs. The western world is warned that it must suppress wheels before it can have better times.

The channel of the ancient Hudson river runs under the sea for many miles, showing that the land was once above the sea.

Calgary Exhibition
and
... Stampede ...

JULY 9th to 14th

Positively will be the most interesting, spectacular and unusual show ever held in Calgary. In addition to regular features such as the Exhibits, Stampede Parade, Stampede, Races, and the marvelous stage production, "The Show of a Century," some of the outstanding new features are the Giant Television, "The Hunter's Paradise," "Alpha—the Robot," and Tractor Races. Special railway fares; fare and a quarter from Alberta, Saskatchewan and B.C. mainland points; special excursions July 10th and 13th from Alberta and B.C. mainland points at 1½ mile each way. Low bus fares.

Admission: Grounds 25c, Bleachers 50c
Reserved Seats: Afternoons 50c, Evenings 25c

C. M. Baker, President, E. L. Richardson, General Mgr.
Calgary Exhibition & Stampede, Ltd.

Melvin Notes

Miss Ray is vacationing on a trip to the Western States.

Mr. and Mrs. Wahl and Helen left Wednesday for California.

A number of Melvin people attended the Carstairs stampede.

Miss Florence O'Brien is spending her vacation in Vancouver.

Miss Marian and Randol Johnston spent Sunday at Cremona with Mr. and Mrs. Glen Johnston.

Melvin won the ball game with Rugby on Saturday, and also the one with Innis Lake.

Mr. and Mrs. Cecil Riddle and friends, of Calgary, visited Mr. and Mrs. Greig on Sunday.

Mr. and Mrs. Thorneycroft and daughter Helen of Calgary were visiting Mr. and Mrs. Landeen.

Mr. and Mrs. Ed Klinek and family spent Sunday with Mr. and Mrs. Peter Johnston.

Miss Ray closed her school for the vacation by holding a picnic at the Dog Pound. Everyone had a very enjoyable afternoon. One of the main events was a ball game between the school team and their fathers, the school being victorious.

Mrs. Dr. Chenoweth and son Roger of Escanaba, Michigan, called on the Youngs' while en route for Alaska.

Miss Dorothy Youngs is spending her vacation at home.

Mr. John Clarke has gone to Nova Scotia to visit his mother.

Mr. and Mrs. A. Krebs and Lester spent Sunday with Mr. and Mrs. Harold Bliss at Bowden.

Miss Maude Vernon from Calgary spent a few days with Mrs. Ben Kreuger.

Margaret and Donald Shannon, Lee Swingle and son Bruce spent their holidays in Banff.

TOWN OF DIDSBURY.

NOTICE is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Town of Didsbury will offer for sale by public auction, at the office of the Secretary-Treasurer, Didsbury, on Tuesday, the 31st day of July, 1934, at 2 o'clock in the afternoon, the following lands:
